

06-27-1985-p. 3

The Scranton Anthracite Museum
And Iron Furnaces Associates
Scranton Anthracite Museum
R.D. #1, Bald Mountain Road
Scranton, PA 18504

The Anthracite Museum Associates and
the Pennsylvania Historical and Museum Commission
cordially invite you to attend a special preview of
GEARS AND WHEELS:
Industry and Transportation in the Anthracite Region
Scranton Anthracite Museum, McDade Park
Thursday, June 27, 1985, from 7 to 9
RSVP (717) 961-4804

When we left the exhibit
at about 9 P.M., we went
to Arnie's house for Lent
Corker — — She showed
us all her Lithuanian
things and a large
album of photographs.
She is a good source of
family history for JVB.

SKP at the wheel
SKP, DW P, JVB — drove down
and attended the
"Preview"; RGT was
also there. Hepburn &
Kiefer cancelled at
the last minute;
a nice exhibit; the
CHS & M lent the
Hendrick Fire Helmut
and some photographs
and the Mitchell
Hose Company uniform.
We saw Jane
Schulenberg &
Florence Gillespie;
also JVB's paternal
grandmother's
sister, Anna, with
whom we had a
nice visit. She
was elated to see
her grand-nephew
(JVB) there, and
wearing a tie
no less. She was
very proud of him,
as well she
should be.

06-27-1985-p. 4

JVB, it appears, will begin working at K-Mart very
soon — in the Sales area. That should be interesting.
Somehow, through Ed Baker, he got the job.

On the way home from Scranton in the car we
got very silly and laughed over the most
ridiculous things, largely food. It all began
when John started talking about eating
meatly worms in the army. We then went
through our ^{personal} food dislikes and had a grand
time.

I don't recall how it started, but DW P
decided, jokingly of course, that since the
Pope was called "eminence" and the Queen
of England was "majesty" that SKP
should be "radiance" — how we laughed
over that.

The Lily report for the day —

- 5 — (on one stem) — Liliun "Firecracker"
- 2 — (on one stem) — upright facing, not
in the throat, ^{so-curved} — deep orange
in the center with spots;
that the flower is deep red.

These lilies are so beautiful — I hope that
the deer don't destroy the bed before they
all bloom.
